About us

Duchy Defibrillators took our first heartbeat at the beginning of 2017 to provide public access defibrillator cabinets & defibrillators.

Due to continued growth we moved in 2019 to Victoria business park in Roche, Cornwall. This move allowed us to expand into our new unit. We have a large workshop on site that allows us to manufacture and stock a range of products.

Our unit also has its own classroom, which allows us to host our regulated courses in house. We also have our offices based here.

We are official stockist of the Heartsine defibrillators and accessories, and we are business partners with Zoll medical as well. This allows us to offer a wide range of defibrillators, pads, batteries & accessories from these Manufacturers. We are also able to supply other manufacturers products.

Our cabinets

Our cabinets are made of aluminium which is then powder coated in green once built. We add vinyl to both side panels of the cabinets, and the door.

The cabinet door vinyl has the cabinet address, ambulance service cabinet number, information and an area for text and logos. This can be used to show who has purchased or donated the cabinet, plus logos. Some are dedicated in memory of someone, and have the persons photo in this area.

The door has a digital coded lock on it, with the batteries located inside the door to allow for easy replacement as and when required. The unlock code is registered with the ambulance service, and the call handler will provide it if required.

The lock also has a key to allow access, as well as an additional battery terminal underneath the lock (this is operated with a 9V PP3 battery held on the terminal). Both are additional ways into the cabinet should the batteries run flat.

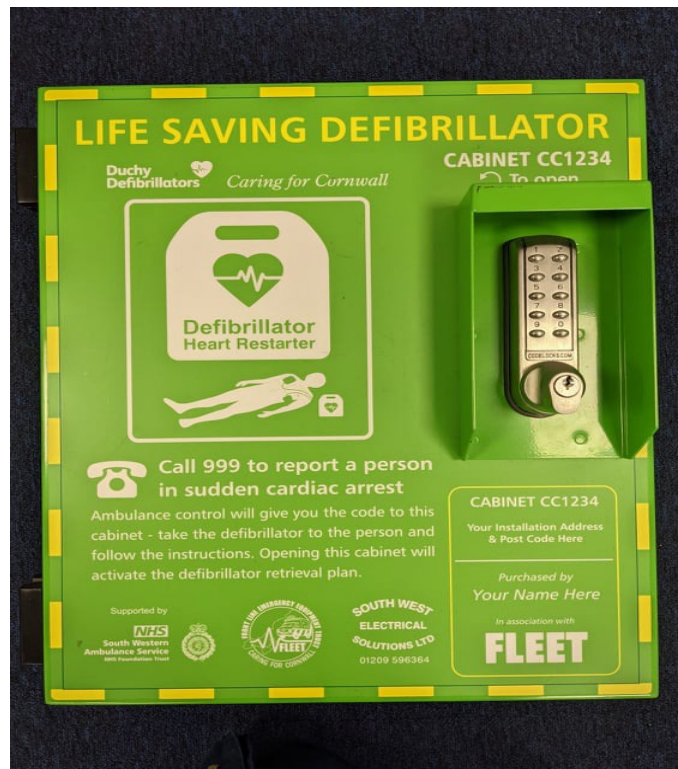

Defibrillators

There are a wide range of defibrillators on the market and available to purchase. They generally have similar functions and features, and can vary in price.

We are official stockist of the Heartsine defibrillators, and a business partner with Zoll medical. This allows us to stock and supply both manufacturers equipment.

The Heartsine defibs have three main models, the 350P, 360P & 500P. The 500P is the device we hold in stock and is our go to device. This defib has a built-in CPR advisor which can determine whether the CPR being given is effective, and will provide feedback - such as good compressions, or push harder. The 350P & 500P are both semi automatic devices, the 360P is automatic. This means the device will shock automatically, or in semi auto machines, a button has to be pushed when indicated.

The Zoll medical device we use is the Cardiac Science G5. This is a semi automatic device, which operates as soon as the lid is opened. It has a clear panel on the lid to show the pad expiry dates as well.

External cabinet package

Our package contains: -

- 1x External cabinet
- 1x Heartsine 500P semi automatic defibrillator
- 1x Set of adult pads for the device
- 1x Carry case for the device
- 1x Resus kit

Cost: -

£1,475.00+VAT (£1,770.00) plus delivery

Our monitored solution

We have designed and built our own cabinet monitoring solution. This system allows for real time information on the status of the cabinet to be displayed on our portal at anytime.

It will provide notifications if anything changes, such as defib deployed. This allows the local community, guardians and us to see what is happening with the cabinet and allows us to assist in the defibs return, and restocking if items have been used.

This is all housed within our side panel inside the cabinet, and can be added to any of our cabinets as anytime.

This system requires an internet connection or mobile data connection

IN CASE OF EMERGENCY

Public Access Defibrillator

AMBULANCE CONTROL WILL GIVE YOU THE CODE TO OPEN THIS CABINET

Duty Defibrillators

CALL FOR HELP 999

HEART MASSAGE

DEFIBRILLATE

... continue CPR with the instruction from the defibrillator until help arrives

LIFE SAVING DEFIBRILLATOR

Duty Defibrillators Caring for Cornwall

CABINET CC0404

Call 999 to report a person in sudden cardiac arrest

Ambulance control will give you the code to this cabinet - take the defibrillator to the person and follow the instructions. Opening this cabinet will activate the defibrillator control plan.
